## VISIONONLINE PAST PERFORMANCE

VisionOnline provides computer consulting, staffing, and technical support services to government agencies, private institutions, .Com, and non-profit organizations.

**Client Name:** District of Columbia Government  
Office of Chief Technology Officer, Washington, DC  
**Contract #:** POTO-2002-C-0006  
**Contract Value:** \$2,500,000  
**Project Name:** Contract Support Personnel – ITTS Project

**Description:** From 1999 to 2008, VisionOnline provided technical project management and personnel support services to the District of Columbia government. VisionOnline team worked on several projects including development of web based telecommunication assets management system for the City. The personnel provided by VisionOnline prepared and defined technical specifications, outlined tasks, reengineer business processes (BPR) of Request For Telephone Services associated with management of telecommunication assets, bill generation using SMDR data, call center, Lucent 9ES switches, and external interfaces into the SOAR accounting and billing system for automatic bill payment via the DC Intranet and secure web access. The team developed and successfully deployed prototype of the system with district-wide roll out expected. Technical environment consisted of HTTP, HTTPS protocol, Visual Studio 6, SQL Server, XML, and Object Oriented programming model.

**Client Name:** State of Delaware  
Department of Technology and Information  
**Contract #:** DTI-057-03  
**Contract Value:** \$1,000,000 - \$2,000,000  
**Project Name:** IT Professional Services Contract – Statewide

**Description:** From July of 2004 to 2007, VisionOnline was awarded a 3-year contract as the preferred vendor of Information Technology Professional Staff Services with the State of Delaware. The VisionOnline contract covers variety of position through out the state from IBM Mainframe Programmers to Help Desk support personnel. A complete list of approved job labor categories under the contract is available upon request. This is a one-year contract with two option years term.

**Client Name:** US Geological Survey – Reston, VA  
**Contract Number #:** 00-USGS-02-D  
**Contract Amount:** \$1,500,000  
<https://miforms.er.usgs.gov> (intranet site)

**Description:** From 2001 to 2006, VisionOnline teamed with a 8(a) prime vendor to provide US Geological Survey support personnel for the AMIS project. The AMIS is an integrated data base system that supports the Bureau's mineral information collection and analysis activities; minerals availability and economic studies; and public land appraisals. The AMIS provides a central source of minerals information that is versatile and responsive to the needs of minerals problems and policy analysts. It will aid the assessment of the U.S. policies and options concerning the minerals necessary for a sound economy and secure Nation. Currently, the AMIS consists of 59 Commodity Data Subsystems, the Central Mailing System, the Respondent Control Subsystem, the US Imports/Exports Subsystem, and a Data Dictionary.

**Client Name:** Aetna Insurance Companies, Hartford, CT  
**Contract #:** 07-MBA01  
**Contract Value:** \$1,000,000  
**Project Name:** Program Management Services

**Description:** From 2007 to present, VisionOnline staff has been providing project management and technical service to Activehealth (Aetna) in support of the PMO office to implement, test, and manage the design and development of an industry leading healthcare product, ActiveAdvice.Net. VisionOnline team automated and optimized business processes using Microsoft technologies. Responsible for integrating business rules and human workflow services, manage business processes, troubleshoot web solutions, and consume and publish Web services. Wrote and maintained Microsoft Project plans, prepared IT budgets, monitor costs, status reports and weekly meetings of the progress against project schedules for each stage of the software development life cycle. .

**Client Name:** Mortgage Banker Association of America, Washington, DC  
**Contract #:** 02-MBA01  
**Contract Value:** \$100,000 - \$250,000  
**Project Name:** IT Services

**Description:** In 2002-2005, the Mortgage Banker Association of America, a leading non-profit organization, selected VisionOnline as its preferred vendor for Information Technology Staffing Agency. Since our relationship commenced in summer of 2002, VisionOnline has been working side by side with MBAA Human Resources Manager and IT Managers to fill several positions on contract, temp to perm and full time permanent positions. The type of positions assigned to VisionOnline includes System Administrator, iMIS Programmers, and Internet Specialist. VisionOnline and MBAA entered into a Blanket Purchase Agreement for a term of one full year with automatic renewal period.

**Department of Defense – JTAV Office (Wash. DC) Web SEI-CMM Level 2 Project**  
**Dates:** 09/98 – 12/99

**Types of Services:** Programming and Project Management  
**Subcontract Value:** \$500,000 Million Defense Contract

As a subcontractor to JTAV office, VisionOnline provided technical staff and Project Management. Directed and defined technical specifications and tasks to reengineer Web Application using Windows NT Internet Information Server using the secure socket layer (SSL) protocol, Oracle 8i as the database server on the Sun, and front-end development was done using 90% C/C++, PERL, Javascripts, HTML and XML code and some JAVA/J2EE. The team developed and deployed web sites with Oracle database as back-end, forms design, e-mail integration, dynamic web pages, and secured SSL or https protocol. Set up LDAP directory and implemented MS- Active Directory in a UNIX heterogeneous environment. Parts of the application (prototypes) were developed in WebObjects 4, VB 5, Oracle WebDB to demonstrate Object Oriented programming model. Participated in SEI-CMM level 2 audits.

**Client Name:** US NAVY – NAVSEA, Crystal City, Virginia  
**Project Name:** System Acquisition Information Link (SAIL) – 200 User Client/Server application.  
**Type of Services:** Technical Support Services  
**Subcontract Value:** \$500,000

**Description:** In 1995-2000, VisionOnline was selected to be the small business provider of information technology services and products to the U.S. Navy NAVSEA PMS 400G contract. This project involved linking the diversified

existing database infrastructure, consisting of over 200 users, of the Systems Engineering Group (SEG). More specifically, VisionOnline provided Systems Assessment, Design and Development Support of the System Acquisition and Integration Link (SAIL) program. The scope of these task orders included, but was not limited to, requirements analysis, system design, software development, and rapid prototyping, testing, integration and equipment acquisition. In addition, VISI personnel provided 24x7 Help Desk, system administration, Oracle Database system administration, and user level support services.
